Timothy J. Ryan

Contacts for analysis-related questions

Timothy J. Ryan, tjr@email.unc.edu
Daniel M. Butler, daniel.butler@wustl.edu

Software

Analyses were conducted using Stata/SE 18.0 for Mac (Apple Silicon)

Coding files

- `addrefs.grec`: file to add embellishments to Figure 3.
- `analysis.do`: conducts all analyses reported in the paper.
- `prepare.do`: prepares raw data for analysis, creating the main analysis dataset (`working_long.dta`)

Raw data files

- `NC_raw.dta`
- `OH_raw.dta`
- `PA_raw.dta`
- `WI_raw.dta`

These files are included the format downloaded from Qualtrics, though they have been converted to the `.dta` file format and extraneous variables not needed to reproduce the results in the paper have been removed.

Working data files

- `cand_attributes.csv`: This file was created by hand, attending to the coding decisions presented in Table S12.

- NC_working_long.dta: Mostly cleaned version of the NC data.
- News Article Content.dta: Dataset with content analysis of news articles, used for Table 1 and Table SI1. This file was created by manually copy-and-pasting coders' original coding .csv files.
- OH_working_long.dta: Mostly cleaned version of the OH data.
- PA_working_long.dta: Mostly cleaned version of the PA data.
- WI_working_long.dta: Mostly cleaned version of the WI data.
- Working_long.dta: The main analysis dataset, created by prepare.do.

Documentation

- 2022_Primary_Survey_-_North_Carolina: Qualtrics survey instrument for North Carolina.
- 2022_Primary_Survey_-_Ohio: Qualtrics survey instrument for Ohio.
- 2022_Primary_Survey_-_Pennsylvania: Qualtrics survey instrument for Pennsylvania.
- 2022_Primary_Survey_-_Wisconsin_withflow: Qualtrics survey instrument for Wisconsin.
- Codebook Instructions for Newspaper Coverage: Instructions presented to undergraduate research assistants who coded newspaper articles.
- README.pdf: This file.
